THÉO RODRIGUES

Three-years Engineering Student in Electronics and Embedded Systems

Open to full-time engineering roles starting in October 2026.

Experience

AIRBUS — APPRENTICE TESTS MEANS ENGINEER
AIRBUS AIRCRAFT - TOULOUSE
2023 - 2026
3 years

Physicals Measurements Department - Project Lead & Hardware Validation Engineer

- Managed the evaluation of emerging sensor technologies, coordinating teams to create a universal instrumentation solution that simplified procedures and reduced lead times.
- Analysis of test data using MATLAB, post-processing of physical measurements to validate systems and generate technical reports on thermal, mechanical, humidity, interferometry, dilatometry and fatigue tests.
- Investigated printed sensor technology through state-of-the-art studies and laboratory testing to evaluate feasibility and performance in real conditions.

Ground Test Component & Integration Department - Test Means Engineer

- Developed a Python-based GUI application to automate the processing and management of complex avionics data files, streamlining workflow efficiency.
- Developed test reports and procedures to verify communication protocols on avionics test benches.
- Participated in meetings involving team budget management and planning, with coordination across multidisciplinary teams.

AIRBUS — INTERNSHIP TESTS MEANS ENGINEER
AIRBUS AIRCRAFT - HAMBOURG
2025
4 months

- Development of a tool that is part of a Jenkins pipeline to automate the SW configuration of Cabin and Cargo System Integrated Bench.
- Development of Python application, Python application packaging (pyproject.toml) and CLI development (Typer / argparse)

LID TECHNOLOGIES — INTERNSHIP EMBEDDED SOFTWARE ENGINEER
LID TECHNOLOGIES - TOULOUSE
2023
4 months

- Conducting software validation for a universal pressure sensor to ensure reliability and performance.
- Crafting detailed test plans and comprehensive test reports.
- Developing a robust software tailored for TPMS sensor functionality.
- Analyzing LF and RF frequencies to optimize sensor data transmission and reception.

Skills

- **Hardware**: Sensors, Antenna, Electronics system development, Micro-controlers, Communication systems, Amplification, Modulation, Filter optimization, Optic fiber, Power electronics, Real time system, Industrial system, Microwaves, Avionics component, ARINC 429, Strain gauge, EMC, CAD modeling, PCB design.
- **Programming**: C++, C, Python, Linux-based coding, SQL, Arduino, HTML/CSS, Git, CI/CD, Matlab, VHDL.
- **Software**: GitHub, Logisim, Scilab, LTspice, PyCharm, VS Code, KiCad, LabView, Jenkins, Docker, Artifactory.
- **Project management** : Planning, Budget, Teamwork, Jira, Gantt, Office suite, Google suite.

Education

- 2021 - 2026 CESI Engineering School Toulouse FRANCE
  Major in Electronics and Embedded Systems, with a specialization in Communication Systems
- 2018 - 2021 Notre-Dame de Bon Secours FRANCE
  High School Diploma with a focus in Mathematics and Chemical Physics

Language

French : Native English : B2 Proficient (TOEIC 935) Spanish : Basic level

Hobbies

Certified tennis instructor, Coastal boating license, Aeronautical Initiation Certificate (BIA), 4L Trophy, Tennis, Hiking, Vidéo, Traveling, Physical exercice, Rugby, Football, Gym, Reading, Art, Music, Swimming
Travel: Iceland, Morocco, Denmark, Germany, Spain, Portugal, Italy, Ireland
