

THÉO RODRIGUES

Second-year Engineering Student in
Electronics and Embedded Systems

Seeking an international engineering internship
Available for a 4-month internship starting May 26, 2025.

🇫🇷 21 years old - FRANCE

📍 31400 Toulouse

☎ +33 7 82 76 82 42

Skills

- **Programming:** C++, C, Python, Linux-based coding, SQL, Arduino, HTML/CSS, Git.
- **Software:** GitHub, Logisim, Scilab, LTspice, PyCharm, VS Code, KiCad, LabView.
- **Hardware:** CAD modeling, PCB design, Electronics system development, Amplification, Modulation, Filter optimization, Sensors.
- **Project management :** Planning, Budget, Teamwork, Jira, Adaptability

Education

High school

Notre-Dame de Bon Secours
PERPIGNAN FRANCE
2018 - 2021

High School Diploma with a focus in
Mathematics and Chemical Physics

Engineering school

CESI TOULOUSE FRANCE
2021 - 2026

Major in Electronics and Embedded
Systems

Experience

AIRBUS APPRENTICE TESTS MEANS ENGINEER AIRBUS AIRCRAFT - TOULOUSE 2023 - 2026

- Developed a Python-based GUI to convert CSV and XML files
- Developed test reports and procedures to verify communication protocols on avionics test benches.
- Production of a state of the art on printed sensor technology, with laboratory tests
- Conducted research to optimize power efficiency on test benches level by implementing connected PDUs.
- Participated in various meetings involving team budget management and planning, with regular coordination across multidisciplinary teams.

LID INTERNSHIP EMBEDDED SOFTWARE ENGINEER LID TECHNOLOGIES - TOULOUSE April - july 2023

- Conducting software validation for a universal pressure sensor to ensure reliability and performance.
- Crafting detailed test plans and comprehensive test reports.
- Developing a robust software tailored for TPMS sensor functionality.
- Analyzing LF and RF frequencies to optimize sensor data transmission and reception.

CESI ACADEMIC PROJECT IN EMBEDDED SYSTEMS CESI ENGINEERING SCHOOL - TOULOUSE

- Embedded Systems: Designed a weather station with sensors using Arduino.
- Electronics: Built a multi-level authentication system for a strongbox (Arduino).
- Servo-Control: Developed a PID-controlled rotating plate for a ball gun.
- Signal Processing: Developed a system for message recovery with Python.
- Amplification: Created a loudspeaker with amplifier and filter.
- Networks: Simulated a company network with Packet Tracer.
